EXPERIENCE

ESP SOFTTECH PVT LTD.

📅 June 2022 – Present   📍 Indore

- Full stack blockchain developer.
- Accomplished blockchain developer with over 2 year of experience, specializing in designing and deploying secure, high-performance blockchain solutions.
- Skilled in leveraging key blockchain technologies including Ethereum and Solidity, to build robust frameworks and innovative solutions.

PROJECTS

Equalizer Exchange

- Built a decentralized trading platform using blockchain for secure, transparent, and efficient peer-to-peer cryptocurrency transactions, enhancing accessibility and trust in the digital asset ecosystem.
- **Roles**: Blockchain Integration Developer.
- **Responsibility**: Led the creation of asset APIs on backend systems, seamlessly integrating smart contracts on the frontend. Communicated with clients to understand their requirements thoroughly and ensured secure, efficient, and transparent transaction processes for decentralized applications.
- **Technologies used**: Next Js, Node Js, Web3 Js, Solidity

Mr. Mint

- Our flagship project, pioneering a groundbreaking ICO platform with versatile applications. Engineered to revolutionize digital transactions, it embodies our company's dedication to blockchain innovation and transformative technology solutions.
- **Roles**: Blockchain Developer and Blockchain Integration Developer.
- **Responsibility**: Led the end-to-end development of mrmint.io, including crafting and testing smart contracts, seamless frontend integration, and implementing transaction tracking via blockchain.
- **Technologies used**: React Js, Node Js, Web3 Js, Solidity

Art Fungible

- Orchestrated the creation of an NFT minting platform and marketplace on the Ethereum network, empowering real artists to transition into the digital realm with their unique artwork, fostering creativity and innovation.
- **Roles**: Blockchain Developer and Blockchain Integration Developer.
- **Responsibility**: Led smart contract development and integration for artfungible.io, ensuring secure and efficient transaction processing within the Ethereum network.
- **Technologies used**: React Js, Node Js, Web3 Js, Solidity
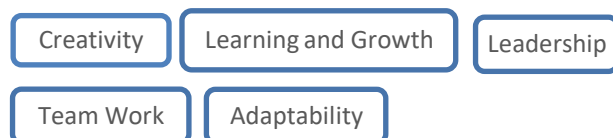

Dappwin

- Innovated a lottery ticket system on the KardiaChain network, offering users a chance to win big prizes, diverse lottery games, and the ability to purchase KAIs with USDTs, redefining the gaming experience.
- **Role:** Full Stack Blockchain Developer.
- **Responsibilities:** Led dappwin.io development from frontend to backend, smart contracts, and integrations. Facilitated client communication, enabling lottery, game modules, and crypto transactions. **Technologies used**: React Js, Node Js, Web3 Js, Solidity.

SKILLS

SOLIDITY · WEB3 JS · ETHER JS · WAGMI · REACT JS · NEXT JS · NODE JS · CSS · EXPRESS JS · JAVASCRIPT · HTML · SQL · MONGODB · REMIX IDE · POSTMAN

QUALITY

Creativity · Learning and Growth · Leadership · Team Work · Adaptability

EDUCATION

Graduation- B.TECH
Malwa Institute of Technology
📅 June 2017 – June 2021, Indore.
Course-
Bachelors of Technology (IT).   **8.2 CGPA**

High Secondary School
Prestige Public School
📅 June 2016 – June 2017, Indore.
Course-
PCM+PE   **61.42%**

High School
Vidhya Sagar School
📅 June 2014 – June 2015, Indore.
Course-
SCC   **6 CGPA.**
